

Masters Internships

This collaborative program between academia and Link aims to develop new and relevant approaches to the technology sector by generating a Master thesis.

Benefits of the program

Develop your thesis with an experienced key-player of IT;

Understand and approach specific problems of various technological areas in products and services;

Design innovative solutions approaching the real challenges identified by the different areas of intervention;

Improve technical and cross-cutting skills by interacting on-the-job with business reality.

Duration

1 year.
