ETAP-Pro

Project: ETAP-Pro
Project Identification: 11306

Compete 2020 project

Start Date: 1 th of March 2017
Duration: 24 months

Investiment: € 672.647,44
Elegible: € 661.537,24
Incentive: € 417.874,86

Entities involved: FEUP (Faculdade de Engenharia da Universidade do Porto)

Context:

Develop a platform that allows integrated management for the automation of tests performed on complex business processes based on various existing systems, applications and services with the following objectives:

- Facilitate the automation of end-to-end testing of the various flows of a business process;
- Enable an integrated management of the automated tests allowing to register on the platform the various tests of the process;
- Allow automation of tests by undifferentiated users;
- Enable a more agile maintenance of the automated tests through a 360º view of the relations of each automated test with the process;
- Ensure the independence of automated tests against automation engines.
- This solution will be made available according to the Cloud Computing paradigm.
